What we do at **Craftwood UK**

Craftwood UK is a leading specialist in bespoke, upholstered banquette seating.

We create quality fixed and free-standing furniture, plus upholstered wall paneling, doors, headboards, ottomans, stools and more to complete the vision for every space. We pride ourselves on our decades of experience, working closely with clients to ensure that projects are delivered to the highest standard whilst meeting all specifications. We offer a plethora of leathers and fabrics, in addition to sustainable options to support the environment.

“The only thing that is constant is change”, the Greek philosopher Heraclitus said around 2,500 years ago. This statement is as true today as it was then, and is now particularly relevant to sustainability. Sustainable furniture is based on closed-looped cycle of recycling – Craftwood UK’s goal is to design furniture that can be used throughout a lifetime or be continually used, disassembled, and reused again.

Our seating can be manufactured with a sprung or platform base, depending on the client’s preference, seating type, venue, budget and application. Styles can vary greatly from contemporary to entirely traditional. From receiving your initial enquiry to project completion, you will be appointed a dedicated project manager. This enables us to ensure a consistently high level of customer service, develop an in-depth understanding of your seating requirements and provide you with just one point of contact.

The manufacturing process begins in the technical drawing department, where the team work closely with both our sales and production departments to ensure your expectations are met and our renowned high standards are maintained.

Our highly skilled production team produce a truly diverse range of seating, from straight and curved seating to booths with an endless range of back styles. We have a dedicated site team who will carry out a survey of your premises. Upon completion, the site team will not only deliver your bespoke furniture but also undertake a full fit at your venue.

The Craftwood UK team are proud to have completed many projects in the UK and around the world, working closely with designers and their clients to bring creative visions to life.

The image shows the interior of a restaurant named Big Mama Carlotta in London. The room is characterized by its rich, dark wood-paneled walls and ceiling. A large, curved mirror runs along the upper part of the walls, reflecting the interior. In the center, a round wooden table is set with plates, glasses, and a folded napkin. The table is surrounded by a large, curved leather sofa and several chairs with green patterned upholstery. Two framed paintings hang on the walls, and a large bouquet of red flowers is placed on the sofa. The overall atmosphere is warm and sophisticated.
